# INTRO

---

At Vaniti House, we believe support and style should go hand in hand. The Living Concept Collection has been created with flexibility in mind – giving you the freedom to design support rails that suit your space, your needs, and your style.

Beautifully designed grab bars are hard to come by, and this range fills that gap by combining safety and style.

Whether used at home, in hospitality, or in professional projects, the collection makes it possible to create bathrooms that are supportive, adaptable, and beautiful.

Our goal is to help shape bathrooms that offer care, comfort, and confidence, without compromising on design.

# LIVING CONCEPTS COLLECTION

---

Discover the Living Concept Collection from Vaniti House – a caring range of flexible modules that lets you create your own customised combination of bathroom support rails.

The collection includes both modular systems and individual rails, giving you endless possibilities to design a bathroom that's supportive, safe, and beautifully personal.

Each element can be adapted with ease, making it simple to match your needs while keeping the look of your bathroom just the way you like it.

With the grab bar series, you can use them on their own or link them together into a full system – giving you the freedom to design support that grows with you.

LIVING CONCEPTS

# 10 YEAR WARRANTY

The Living Concepts support rails are crafted to the highest standards, with meticulous attention to material selection, manufacturing quality, design, and functionality. The support rails are covered by a 10-year warranty, with the exception of the pedal bins, which carry a 5-year warranty.

Should a functional defect arise within the warranty period, and upon presentation of valid proof of purchase, the product will be repaired or replaced with an equivalent item. If repair or replacement is not possible, a refund of the purchase price will be issued. The customer must notify Vaniti House ([info@vanitihouse.com](mailto:info@vanitihouse.com)) in writing as soon as the defect is identified.

This warranty applies solely to the product itself and does not cover any consequential or indirect damages. The warranty remains valid provided the defect is not caused by misuse, neglect, or abnormal use.

## CARING FOR YOUR PRODUCT

To maintain the enduring quality and finish of your Living Concept product, we recommend regular cleaning using a soft microfiber cloth and lukewarm water. If needed, a mild soap solution may be used. Always dry the surface thoroughly after cleaning to prevent water marks or limescale build-up.

Avoid abrasive cleaners, scouring pads, steel wool, or harsh sponges, as these may scratch or damage the surface finish.

## INSTALLATION

The rails have a tested load capacity of up to 150kg when correctly installed. For safety and performance, they must be installed by a qualified professional and fixed into a solid brick or masonry wall using appropriate fixings. Vaniti House accepts no responsibility for failure, damage, or injury resulting from incorrect installation or installation into unsuitable substrates.
